

2022 PROJECT GUIDE

A list of projects that help us develop our site so that we can fulfill our vision to:

“Share Christ in a Wilderness Setting”

We are looking for people to either help fund the material for a project or to come and build a project. Email us at atbrent@bluebronna.org and let us know what your wishes are. Brent—Camp Director

HAY BOSS

COST: \$4,500.00 Built

\$3,250 just materials

Material Funded

Group to Build as it
comes in a Kit

This Hay Boss is an automatic feeder that allows horses to eat at a leisurely place while grazing in a natural way. It enables the feeder to be put on a fence line to feed two paddocks of horses at once. Rain, snow, mud, wind and waste are no longer an issue with Hay Boss Feeders. It will help at Coat Creek as well when no one is there as we will not have to go back up every day to feed horses. This comes in a kit so we will need someone to put it together.

CORRAL FENCE

PHASE 1 COST: \$1,000 posts

\$2,000 Railings

Material Funded

Group to Build

We are looking at redoing the whole paddock area at camp. We have had too many horses get ripped up from the barb wire. We want to enlarge the paddock area as well as create some more smaller paddocks. This will be a 2 –3 phase/year project so the amount stated is for phase one which will be the areas closest to the barn.

HORSE SHED

COST: \$3,750.00 Built

\$2,500 Material

☐

Material Funded

☐

Group to Build

Sometimes our horses just need to get out of the wind, rain and sometimes the snow. With starting to re-do the corral area, this will be a great addition.

HORSE TRAILER

COST: \$7,000—\$10,000

☐

Funded

We have a 20 foot trailer to haul horses with but there are a number of times when we only have to haul 2-3 horses. Having a smaller trailer will save on fuel, wear and tear on the truck and will be a lot easier to haul over the hump back and forth between Coat Creek and Willow Creek. It needs to be a gooseneck trailer. Our present trailer also needs work if someone has time to fix it. The front of the trailer has come a part.

SNOWMOBILE

We are looking for a snowmobile that someone would be willing to donate. This would be used during winter camps to pull kids around the open area on a sled or toboggan. A donation receipt can be issued for the value of the machine.

KITCHEN COOLER

COST: \$2,600.00

☐ Funded

We want to take a step in kitchen upgrades this summer with a new cooler (and BBQs below). Right now, all of our need to be cooled supplies are in 6 fridges. With the Increase of camp programs, we will need even more space to store food.

BBQ

COST: \$1,500. each

☐ Funds

Our two BBQs have seen better days and need to be replaced. We do a BBQ every Sunday in the month of August and multiple days through the rest of the summer and Fall. We will need 2 BBQs.

SEPTIC SYSTEM FOR THE FAMILY CABIN COST: \$40,000

☐ Material Funded

☐ Someone to do the work.

This is a new system that will handle the needs of the new Family Cabin as well as our proposed Washhouse. We need someone who has the expertise to dig the area and someone to install the system.

250 GALLON WATER TANK

COST: \$900.

Material Funded

This tank will supply potable drinking water for our programs at Coat Creek. It saves us hauling water or using an elaborate water system from the creek.

GAS FIREPLACES IN CABINS

COST: \$1,500 EACH

Material Funded

Person to install

In order to cut down on monthly electrical costs and to add atmosphere to each cabin, we would like to install a gas fireplace in each cabin. The Family Cabin has one and one cabin has a wood stove which is very popular.

DOUBLE WALLED FUEL TANK

Cost: \$7,000.00

Material to Fund

Group To Build the
concrete pad

This will make our fuel storage more safe and save camp staff from going to town and hauling gas and diesel to camp. It will also save us money on fuel by purchasing our fuel in bulk. It will be placed on a concrete pad.

Blue Bronna 2022 PROJECT GUIDE Wilderness Camp

As we prepare for a major expansion at the camp, there are two projects that need funding that do not require physical labor.

For both of these, the labor will be done by the company that provides the service.

POWER EXPANSION

COST: \$15,000

A bigger transformer is needed to provide the power that will be needed as we build more facilities.

GAS EXPANSION - PART 1

COST:\$7,500

The gas expansion will be in two parts. The first part is to bring in a bigger line to the Director's house and then put in a new line to the proposed Washhouse/Services Shed.

The second phase will be to do the work ourselves as we take the service to the cabins and the Cookhouse.

2022 PROJECT GUIDE

OTHER SMALL PROJECTS THAT WE NEED PEOPLE TO JUST COME AND DO.

THERE IS NO OR LITTLE COST THAT WILL JUST COME OUT OF OUR BUDGET.

- Paint inside of Coat Creek Cook Trailer
- Build Bunk beds into one cabin
- Re-lash all tarp structures
- New cover for garbage trailer
- Build a new frame for chapel
- Re-stain the Honeymoon Swing
- Repaint prayer deck benches and table
- Build a Lean to off of the Program Shed
- Stain the new Firepit Swings
- New brakes on the Massey Ferguson tractor
- Fix the hydraulics on the John Deere tractor
- Trenching of water and sewage lines to the Family Cabin, the New Wash house as well as digging by the Director's house to fix a leak in the concrete wall.

For these and other projects at camp, simply email Brent at the camp at
